ASAD BHATTI

Junior Full Stack Developer

📞 +923134705603   @ Asadb9074@gmail.com   🔗 https://portfolio-saddys-projects-d3d947cc.vercel.app/   📍 Bahawalpur, Punjab

SUMMARY

I am a dedicated and self-taught MERN stack and frontend developer with hands-on experience building scalable, user-centric web applications. Specialized in creating seamless, responsive interfaces and efficient backend architectures with a strong command of React, Node.js, Express, Fastify, and MongoDB. My experience spans diverse industries where I have enhanced user engagement and optimized performance.

EXPERIENCE

MERN stack Developer

Freelancer

📅 11/2023 - 10/2024   📍 Remote

Upwork is a famous platform for freelancers to work from home and earn a good living from anywhere around the world.

- Debugged many projects and fixed clients' work in both front-end and back-end.
- Helped clients build their startup projects including a doctor appointment system and gym management system.
- Remodification of existing websites.

Junior Full Stack Developer

Code's Thinker

📅 10/2024 - 01/1970   📍 On-site

Code's Thinker is a company that provides a wide range of solutions including creating websites, web design prototypes, marketing, and lead generation data entry skills.

- Increased the performance of 20 clients by creating a user-friendly platform.
- Developed the back-end of 5+ websites with complete system design.
- Designed and developed front-end UI using ReactJs, CSS and Material UI.
- Identified errors in back-end code and provided solutions that increased customer satisfaction rating to 93%.

EDUCATION

B.S. in Information Technology

NCBA&E

📅 09/2019 - 10/2023   📍 Bahawalpur, Pakistan

SKILLS

apis	AWS	Axios	bootstrap
Configuration	CSS	Data Entry	
Docker	Front-end	HTML	Json
JWT	Lead Generation	Material UI	
MongoDB	Mongoose	node	node js
node.js	npm	reactjs	Redis
Redux	redux toolkit	rest	socket.io
tailwind	Typescript	vercel	XML

TRAINING / COURSES

MERN stack Development

Typescript

Docker

Redis

AWS

PROJECTS

React Generator CLI

React Generator CLI helps React developers set up their projects efficiently.

- Created a command CLI to generate React application startups.
- Automated Redux and Redux Toolkit.
- Configured project directories and auto-installed necessary packages.
- Implemented special custom hooks to support API error handling.
- Configured Tailwind and Material UI.

WhatsApp Web Application

WhatsApp web application project with both frontend and backend developed using React, Express, MongoDB, Node.js, and Socket.io.

- Created a messaging application with a real-time communication system using socket.io.
- Allows users to send friend requests.
- Enables communication in public and private environments.
- Allows sending and receiving media files such as photos, videos, and audios.
